

Insulin and Blood Pressure Trends by BMI Category and Risk Group

Glucose and Blood Pressure Trends by BMI Category and Risk Group

Glucose Distribution Across Ages in each Risk group

Dashboard Overview

This dashboard presents a visual analysis of diabetes-related health indicators across different BMI categories, age ranges, and risk classifications. It is also designed to explore the correlations between key health metrics and diabetes risk.

It aims to help identify high-risk groups based on key indicators such as glucose level, insulin level, blood pressure, and BMI.

Key Indicator Averages by Risk Classification						
High			Medium			
			Insulin 139.44			
			Glucose 120.80			
			BloodPressur...		Ag...	
						BMI 3...
BloodPressur...		SkinTh...	BMI 3...	SkinT...		
Age 38.04						
Low			BloodPressur...		BM...	
					Age 29....	
			Glucose 87.22		SkinT...
